Jakarta Barat, Daerah Khusus Ibukota Jakarta, 11530

I am a Computer Science student seeking opportunities in **Data Analytics**, **Data Engineering**, **Software Development**, and **Application Development**, with a strong background in Database Streaming and a growing passion as a **Blockchain** enthusiast.

EDUCATION

University of Bina Nusantara

Bachelor's Degree in Computer Science

Bandung, Indonesia

Expected Graduation: 2027

- 5th Semester specialized in Database & planning for Blockchain stream
- Member of Bina Nusantara Computer Club , Himti

EXPERIENCE

Activist External Event Organizer of BNCC Bandung

Master Ceremony of comparative study

Bandung, Indonesia

Oct 2023 - Sep 2024

- Served as MC in a comparative study event attended by members from all BNCC regional branches and CCI Telkom.
- Facilitated sessions to ensure smooth communication between participants from multiple organizations.

Event Coordinator Division of Techbinar

- Coordinated the event division for Techbinar, successfully attracting 300+ participants both onsite and online.
- Managed event flow, speaker liaison, and ensured the event ran according to timeline.

Event Coordinator Division of Techblast

- Led the event division for Techblast, collaborating with 8 schools and gathering more than 800+ attendees.
- Supervised team members, created workflows, and ensured smooth execution of activities.

Committe External Event Organizer of BNCC Bandung

Mentor Event Division of Techbinar

Bandung, Indonesia

Sep 2024 - Sep 2025

- Mentored the event division and successfully coordinated an event attended by 600+ participants in hybrid format.

PROJECT

Clovio – E-commerce Website

Frontend Developer

Jakarta, Indonesia

Mar 2025 - Jun 2025

- Developed responsive and interactive React.js components for user interface.
- Focused on smooth navigation, product listing pages, and checkout flow.

Frontend & Data Developer

Jakarta, Indonesia

Mar 2025 - Jun 2025

- Built the frontend using React.js with responsive UI.
- Connected to a backend powered by Flask and integrated a machine learning model Tabnet to predict user age.

Decentralized Voting System – Full Stack DApp

Blockchain Developer

Jakarta, Indonesia

Jul 2025 - Aug 2025

- Developed a full-stack decentralized application (DApp) for secure voting.
- Implemented Solidity smart contracts and tested with Hardhat framework.
- Integrated blockchain with frontend for real-time result tracking.

NextPath – AI Chatbot & Career Tracking Platform

Frontend Developer

Jakarta, Indonesia

Jul 2025 - Aug 2025

- Built the frontend interface for an AI-powered chatbot and career tracking system.
- Collaborated in integrating user-friendly dashboards for career insights.

BukaPajak – Blockchain & Smart Contract Platform

Smart Contract & Architecture System

Jakarta, Indonesia

Jul 2025 - Aug 2025

- Designed and implemented smart contracts in Solidity using Hardhat framework on Sepolia testnet.
- Built the system architecture combining frontend, backend, and blockchain for secure proposal submission and fund disbursement.
- Integrated decentralized storage with IPFS for handling legal documents.

RESEARCH & PUBLICATIONS

Performance Comparison of Ethereum and Solana Consensus Mechanisms

Smart Contract

Jakarta, Indonesia

Jul 2025 - Aug 2025

- Conducted experimental testing on Ethereum Sepolia and Solana Devnet.
- Measured TPS, latency, gas fees, and validator confirmation time.
- Automated data collection and logging for consensus analysis, with results planned for academic paper submission.

Certification

- The 2024 ICPC Asia Jakarta - Indonesia National Contest (ICPC), International Collegiate Programming Contest, 2024
- Hackathon 8.0 "Hack the Horizon: Redefining Boundaries with Code", BNCC (Bina Nusantara Computer Club), 2025
- The 10th International Conference on Computer Science and Computational Intelligence (ICCS CI), BINUS University, Paper ID 377, 2025
- Lomba Web Development Tingkat Nasional, Universitas PGRI Semarang, Nomor 001/A/PAN_INFEST/HIMFORMA/VII/2025, 2025
- ML for Beginners, Sololearn, Nomor CC-LXIPWLOF, 2025
- Visualize Your Data, Sololearn, Nomor CC-ZAVPMBFH, 2025

SKILLS

Programming & Web Development

- HTML, CSS, JavaScript, React.js
- PHP, MySQL, Flask, Tailwind CSS
- REST API integration & system architecture design

Data Science & Machine Learning

- Python (Pandas, NumPy, Matplotlib, Scikit-learn)
- SQLAlchemy, SQLite, Power BI
- Exploratory Data Analysis (EDA) & Data Visualization

Blockchain Development

- Solidity
- Smart Contract Development, DApps, IPFS Integration

Project & Event Management

- Event coordination
- Public speaking & Master of Ceremony (MC)
- Leadership, mentoring, workflow documentation
